

Engineered Products for Every Environment and Every Task

Wiping Solutions

WYPALL
BRAND

KIMTECH
BRAND

Creating more value for you through: healthier, safer and more productive workplaces.

Providing efficient solutions

Why choose our wiping solutions?

KIMBERLY-CLARK PROFESSIONAL* is a leading global supplier for total health, safety and hygiene solutions. You can depend on us when you require reliable, high performing wiping solutions.

That's because we are totally committed to:

- Personal service, maintaining strong relationships with every customer, assisting you in finding the best product solutions
- Consistent high-quality, supported by industry accreditations
- Innovative products, that make a reliable and positive difference in all workspaces, reflected by our global WYPALL* and KIMTECH* Brands
- Sustainability, always integral to the way we design, manufacture and transport our products

Understanding what is important to you

Through our work with customers around the globe, we understand the importance you place on improving efficiency. That too is our number one focus.

We always create wiping solutions with efficiency in mind, helping your workforce get the job done quicker, to a higher hygiene standard and for a better value.

Putting your efficiency first

With more than 15 years of wiping expertise, we understand the pressures of managing costs whilst maintaining high levels of hygiene and productivity.

In putting your efficiency first, we will always deliver:

- The most suitable products for each of your wiping requirements
- Cost effectiveness, giving a choice of dispensing systems and formats to help you to reduce wiper usage
- Advanced technologies like HYDROKNIT* material and AIRFLEX* fabric, that perform wiping tasks better and reduce disposal costs

Our Sustainability vision – **CREATING A BETTER WORLD FOR YOU**

At KIMBERLY-CLARK PROFESSIONAL* we believe sustainability is essential to any business. That is why we are working towards a set of core sustainability objectives. You can feel confident that when you purchase our products, you are not only improving the health of your employees, you are supporting a more sustainable world.

People

Provides the tools needed to reduce the spread of germs that cause illness.

Safe & Efficient work environment = Happy employees
= higher level of Engagement
= improved Productivity

Planet

Resources are finite, so we work to continually reduce environmental impact at each stage of the product lifecycle, from design to final disposal.

Our Heavy Duty Wipes weigh five times less than standard rags, creating 37% less waste (by weight) on disposal.

Our WETTASK* System reduces solvent use by:
UP TO 20%
and reduces VOC's

G10 Arctic Blue Gloves
100% MORE GLOVES PER CASE
than traditional formats, reducing packaging waste by up to 55%

37% LESS

Our Wiper Management Service can remove and recycle our disposable wipers*.

Product

We aspire to improve the well-being of those who use our products and reduce the amount of product required for a given task, helping to improve the economics of your business.

Our Heavy Duty Wipes are twice as absorbent as other light dried crepe wipers, so you use less.

LESS

Our Folded Reusable Respirators can be used for up to two shifts, so you use less and waste less.

*Available in France & Germany only.

Helping you to reduce waste and improve your productivity

Poor performing products and unreliable dispensing can increase waste and consumption.

As the cost of disposal is based on weight or volume, whether you are disposing hazardous waste or not, using a wiping solution that has superior performance combined with a controlled dispensing solution is critical to reduce your disposal costs and help support the profitability of your business.

Our wiper products feature smart packaging solutions and considering your consumption, they are designed to reduce the amount you dispose of.

With our manufacturing heritage, we understand only too well how critical it is to find ways to reduce costs and improve margins. With this in mind, our products and systems are designed to:

- **be easily maintained**
- **be easily refilled**
- **be more efficient**
- **reduce paper waste**
- **reduce storage space**

All of this saving you time and helping you reduce costs.

We can work with you to help you fight waste and improve your processes and efficiency.

**reduce
time waste**

**reduce
paper waste**

**reduce
storage waste**

Selecting the right wiper for your need

Across the entire range, we offer a wide range of performance options, formats and dispensing solutions. By working together, we will find you the best wiping solution that is tailored to your exact needs and tasks.

When deciding what is most important with the task at hand, consider the following three areas.

01

Wiper Performance

What type of wiper characteristics do you require to complete your task?

- Highly absorbent, faster and more effective?
- Strong and tear resistant?
- Resistant to solvents?
- Low lint?
- Coloured for task segregation?
- Disposable or reusable products?

02

Dispensing Systems

What kind of dispensing do you require for your task?

- Would high capacity, a mobile system or hygienic single sheet dispensing be best in your environment?
- Which size of wiping sheet would be most effective, but not wasteful?
- Do you need a special system to reduce product damage or prevent wipers becoming contaminated?

03

Waste Disposal

What type of waste disposal do you need to consider?

- Are you concerned about using less and throwing less away?
- Is better wiping performance as important to you as the cost to the environment?
- Are you wiping hazardous substances?

Your Selection Guide

This table illustrates specific wiping features and most appropriate usage, helping you to quickly identify the best wiping solutions for your needs. Please consult the product pages for more specific examples. We will support you selecting the right solution for your application.

Metal Manufacturing

We understand the pressure of managing costs whilst maintaining high levels of efficiency and quality. By working together, we can help to optimise your wiping effectiveness whilst reducing costs and waste levels. We supply an extensive high-quality range of products that support the entire Metal Manufacturing processes:

Metal Fabrication

When a piece or a sheet of metal is shaped or converted into a part, a component or even a finished product, processes such as grinding, cutting, forming or machining are used.

Tasks involved are:

General wiping

Product suggestions:

WYPALL* X80 Cloths, WYPALL* L30 Wipers,
WYPALL* Cleaning Wipes, Industrial Cloth

Surface preparation and metal finishing

When a part or component has been fabricated, the surface needs to be cleaned and prepared, for example through sanding, shot blasting, solvent and chemical cleaning. Once the surface is prepared, it is then ready to receive a protective layer. Processes such as painting, cutting, or plating are used.

Tasks involved are:

Controlled environment wiping, solvent wiping, surface cleaning and delicate surface wiping

Product suggestions:

WYPALL* X80 Cloths, WYPALL* L30 Wipers, KIMTECH*/ WETTASK* SXX Wipers, KIMTECH* Surface Preparation Microfibre Cloths, Industrial Cloth, Precision Engineering Cloth

Assembly

When components are joined to make a finished product through processes such as bolting, clipping, fastening, riveting or gluing.

Tasks involved are:

General wiping

Product suggestions:

WYPALL* X60 Cloths, WYPALL* L20 Wipers, KIMTECH* Disposable Microfibres, Precision Engineering Cloth

Maintenance and planned down time

When machinery, tools and plant vehicles are prepared, repaired and cleaned on a regular basis.

Tasks involved are:

General wiping

Product suggestions:

WYPALL* X80 Cloths, WYPALL* L30 Wipers, WYPALL* Cleaning Wipes, Industrial Cloth, Precision Engineering Cloth

Transportation

We understand the importance of balancing high-quality wiping with improved productivity and profitability. Designed for the task, our wiping solutions get the job done to a high standard, first time. Reducing wiper and solvent usage and ultimately your waste. We have a wide range of wiper products to better support specific transport manufacturing tasks:

Surface preparation and metal finishing

When a part or component has been fabricated and the surface needs to be cleaned, prepared and finished, for example during panel preparation and painting in automotive applications.

Tasks involved are:

Controlled and critical environment wiping, i.e. pre-paint applications in the automotive industry and final painting in the aviation industry

Product suggestions:

KIMTECH*/ WETTASK* SXX Wipers, WYPALL* L40 Wipers, WYPALL* X80 Cloths, KIMTECH* Wipers, Industrial Cloth, Precision Engineering Cloth

Assembly

When several parts or components are assembled together to create a frame or a finished product.

Tasks involved are:

General wiping, controlled and critical wiping, i.e. engine assembly and fuel tank cleaning in the aviation industry.

Product suggestions:

KIMTECH*/ WETTASK* SXX Wipers, KIMTECH* Sealant Wipers, WYPALL* Cleaning Wipes, WYPALL* X80 Cloths, Industrial Cloth

Final finishing and delivery

When a finished product needs to be thoroughly cleaned prior to delivery to the customer.

Tasks involved are:

Delicate wiping, polishing, buffing and general cleaning

Product suggestions:

KIMTECH* Microfibre Cloths, WYPALL* Cleaning Wipes

Maintenance

When machinery, tools and plant vehicles are prepared, repaired and cleaned on a regular basis.

Tasks involved are:

General wiping

Product suggestions:

WYPALL* X80 Cloths, WYPALL* L30 Wipers, WYPALL* Cleaning Wipes, Industrial Cloth, Precision Engineering Cloth

Food Processing

Better cost management does not mean compromising on high hygiene standards. Designed to help comply with vigorous cleaning programmes, our food processing products are designed for ease of use and speed, minimising down time and supporting your brand success. During development, we have considered each processing phase:

Cleaning during product changeovers

When a line is used to produce different products or flavours of the same products, changeover stops are required for the line to be cleaned to remove any traces of the previous products.

Tasks involved are:

Cleaning and drying of machinery equipment

Product suggestions:

WYPALL* X50 Cleaning Cloths, WYPALL* X80 Cleaning Cloths, WYPALL* L40 Wipers, Industrial Cloth

Cleaning production debris/spillages

When food spillage or accumulation of ingredients have to be removed from the process to stop build up of ingredients contaminating the process.

Tasks involved are:

Wiping excess ingredients, spillages

Product suggestions:

WYPALL* X50 Cleaning Cloths, WYPALL* L40 Wipers

Maintenance

When machinery, tools and plant vehicles are prepared, repaired and cleaned on a regular basis.

Tasks involved are:

General wiping

Product suggestions:

WYPALL* X80 Cloths, WYPALL* L30 Wipers, WYPALL* Cleaning Wipes, Industrial Cloth, Precision Engineering Cloth

Healthcare

In hygiene critical environments, our extensive wiping range can help to minimise the spread of infection and enhance patient confidence. They are the safest choice, to help meet healthcare cleaning protocols and to reduce the spread of germs and cross-infection. Likewise, our patient products deliver better comfort and care.

Cleaning and disinfecting

When healthcare facility areas are required to be maintained at the highest levels of hygiene, such as wards, patient treatment rooms, bedrooms and nursing stations.

Tasks involved are:

Surface cleaning and disinfection, task segregation

Product suggestions:

WYPALL* X80 Cleaning Cloths, WYPALL* X50 Cleaning Cloths, KIMTECH*/ WETTASK* DSX Wipers

Patient care

When high patient throughput demands covering solutions which can be implemented swiftly between patients and when cleaning solutions are required to maintain the patient's highest personal hygiene.

Tasks involved are:

Cleaning, drying and disinfecting patients and covering surfaces

Product suggestions:

WYPALL* L20 Wipers - Small Rolls, WYPALL* L40 Wipers – Quarterfold, KIMTECH* Absorbent Towels, KIMTECH* Medical Wipes

Food preparation and restaurants

When wiping systems are required in food preparation areas to mop up spills and wipe down surfaces and maintain cleanliness of restaurant facilities.

Tasks involved are:

Mop up spills, cleaning of equipment and surfaces

Product suggestions:

WYPALL* X80 Cleaning Cloths, WYPALL* X50 Cleaning Cloths, KIMTECH*/ WETTASK* DSX Wipers

Maintenance of facilities

When maintenance of facility equipment and public areas is required to protect against incoming infection as well as potential cross contamination.

Tasks involved are:

General wiping, disinfection wiping, task segregation

Product suggestions:

WYPALL* X80 Cloths, WYPALL* L30 Wipers, WYPALL* Cleaning Wipers, KIMTECH*/ WETTASK* DSX Wipers, WYPALL* X50/X80 Cleaning Cloths

Reusable & Strong Cloths

The reusable WYPALL* X Cloths are absorbent and solvent resistant and strong enough to tackle tough tasks, whilst also designed to be cost and time efficient.

Using our patented HYDROKNIT* Material, WYPALL* X Cloths are manufactured by entangling pulp and polypropylene together using high-pressure water jets. Creating reliable wipers that keep their shape and can be used again and again:

- Highly absorbent – can mop up spills, clean hands and wipe down machinery quickly
- Strong and durable when wet and dry – ideal for tough tasks such as machinery cleaning
- Resistant to most solvents - ideal for applying solvents to a surface or cleaning down
- Contain no adhesives or binders, reducing surface residue

Improved absorption

Our unique PowerPockets technology is now available in WYPALL* X70 and X80 Cloths. Giving better absorption, improved cloth like feel and better scrubbing power.

Built in pockets help trap dirt and grime quicker and more effectively, leaving surfaces cleaner and reducing waste.

Average rag

WYPALL* X80

WYPALL* X80 Cloths weigh 5 times less than an average rag. By throwing away less, it costs you less.

Precision Engineering Cloth

Puncture resistant highly flexible cloths for cleaning tight spaces

- **Tear resistant, HYDROKNIT* Material**
Designed to be puncture resistant these thin cloths maintain maximum flexibility to reach the tightest of places
- **Low lint cloths**
Special fibre technology reduces lint compared to most other non-wovens
- **Right size for the task**
Available in handy small formats to help reduce waste: Quarterfold or a unique handy pop up box

Ideal for:

- **Intricate wiping**
A supple cloth-like material allows maximum flexibility for intricate parts or components
- **Wiping in Metal Manufacturing**
Abrasion and puncture resistance for tough jobs

Supplied formats:

Technology / Certification:

Colour Options:

Available with our Power Pocket technology for additional wiping efficiency and good hand feel

Industrial Cloth

Our strongest cloths, bulky yet supple for heavy-duty tasks, are perfect replacements for rags

- **Tear resistant, fast absorbing HYDROKNIT* Material**
Abrasion resistant cloths for tough jobs
- Supple material with a cloth-like feel for efficient and comfortable wiping
- Two formats to suit your needs large roll and quarterfold

Ideal for:

- **Heavy maintenance tasks**
Excellent absorbency for grease and oil
- **Wiping in Metal Manufacturing**
Cleaning rough surfaces without falling apart
- **Prepping surfaces**
Rinsable wipers, designed for repeat usage with oil, grease, lubricants and cleaners

Supplied formats:

Technology / Certification:

Colour Options:

Incredibly, just 5 large rolls of WYPALL* X90 Cloths can absorb 200 litres of oil!

WYPALL* X90 Cloths

2-ply material gives better absorbency

WYPALL* X90 Cloths efficiently improve workplace wiper performance:

- **Reducing product waste**
Two plies of advanced HYDROKNIT* Material are bonded together, giving bulkier, stronger wipers that can reduce product waste by up to 35%¹
- **Get jobs done quicker**
Combining polyester and wood fibres, this 2-ply material creates a more absorbent wiper, for faster more effective wiping
- **Reduces risk of surface damage**
Polyester fibres create a soft and comfortable wiper, making it easier to clean difficult areas
- **Innovative controlled dispensing**
Helping control usage costs and reducing waste further

Ideal for:

- **Highly absorbent**
To mop up oil or water spills
- **Easy and intricate wiping**
For machinery and small components due to high conformability
- **Feels like cloth**
Soft enough to clean hands

Supplied formats:

Technology / Certification:

Colour Options:

¹ Compared with WYPALL* X80 Cloths, assuming the same cloth use

One sheet of WYPALL* X80 Cloth is strong enough to lift a weight of 60 kg.

WYPALL* X80 Cloths

Strong, bulky cloths, for tough maintenance and wiping tasks

Fast, high absorbency coupled with great tear resistance strength. WYPALL* X80 Cloths are a perfect replacement for rags:

- **Tear resistant, fast absorbing HYDROKNIT* Material**
Strong enough to clean the roughest surfaces without falling apart
- **Use with water and solvents**
Can be rinsed out and reused
- **Roll and sheet dispensing formats**
To suit your needs

Ideal for:

- **Heavy duty machine and part wiping**
Cleaning rough surfaces without breaking up
- **Maintenance tasks**
Wiping away grease, oil and absorbing heavier soiling
- **Prepping surfaces**
Rinsable wipers, for use with solvents or water

Supplied formats:

Technology / Certification:

Colour Options:

WYPALL* X70 Cloths

Fast-absorbing, for medium-duty tasks

Even when wet, WYPALL* X70 Cloths stay soft, bulky and keep their shape:

- **Long-lasting, efficient absorbency**
Quickly wipes away grease, grime and solvents
- **Easy to work with**
Stays soft and durable, wet or dry, and can use with solvents
- **Cost efficient**
Just rinse out and reuse, cutting waste
- **Multipurpose**
Keeps tools and machinery clean, plus food contact compliant

Ideal for:

- **Heavy maintenance**
Economically wiping away oil, grease, grime and solvents from surfaces and tools
- **Tools and machinery cleaning**
Wiping up cutting fluids and protecting parts
- **Metal surfaces**
Fast-absorbing, soft and bulky, for easy and efficient cleaning

Supplied formats:

Technology / Certification:

Colour Options:

WYPALL* X60/50 Cloths

Versatile and durable, for precision wiping

Created for light duty, general purpose wiping tasks, including glass cleaning, WYPALL* X60 and X50 Cloths are:

- **Conformable and light-weight**
For delicate part cleaning, soaking up light spills, reaching difficult surface areas and hand wiping
- **Suitable for thinner and solvent application**
Yet strong enough to scrub off adhesive, remove oil and debris
- **Sized specifically for lighter tasks**
Giving consistent performance, helping to reduce waste and operational costs

Ideal for:

- **Applying lubricants and precision cleaning**
Using thinners and solvents. Reaching tight creases and wiping down intricate machinery parts
- **Glass cleaning and wiping**
Removing dirt, oil and debris
- **Cleaning final assembly parts**
Providing a high-quality finish

Supplied formats:

Technology / Certification:

Colour Options:

Our WYPALL* X50/80 Cleaning Cloths contain fibres.

WYPALL* X80/50 Cleaning Cloths

High-performing for hygienic segregated cleaning tasks

Fast, ultra-absorbent, tear-resistant and longer lasting:

- **Four colour variants**
One for each cleaning task, reducing the risk of cross contamination, enhancing regulatory hygiene practices
- **Rinse and reuse**
Optimal usage, increasing the life of every cloth, helping to reduce waste and lowering cost in use
- **Two performance levels**
Choose from high absorbency, longer lasting strength (WYPALL* X80 Cleaning Cloths) or a value hygiene wiping system (WYPALL* X50 Cleaning Cloths)

Ideal for:

- **Kitchen tasks, cleaning tables and counters**
Cleaning down equipment and food preparation tools, wiping away oil and fats. Rinse and reuse, lowering cost in use
- **Industrial-scale food processing tasks**
Ultra-absorbent and tear resistant for deep cleaning, changeovers and conveyor cleaning
- **Reducing the risk of cross contamination**
Coloured cloths for each area/task, reducing germs spreading between washrooms, clinical and patient areas

Supplied formats:

Technology / Certification:

Colour Options:

Single-use Wipers

When you need a single-use wiper for mopping up spills, cleaning hands and wiping surfaces, this range excels.

That's because our unique AIRFLEX* Fabric structure, with large air pockets, absorbs more, and is stronger and thicker than a conventional tissue wipers' structure. So fewer sheets are needed for each job.

Ideal for cleaning up large surface spills, the WYPALL* L Wiper Range is both task and cost efficient. It is also the preferred choice for 8 out of 10 users¹.

- Unrivalled wet strength, thanks to unique fibre structure, cleaning up spills fast without falling apart or becoming soggy. More than 2 times stronger when wet, compared to conventional wipers²
- Thicker feeling wipers, our WYPALL* L Wiper range is 19% more bulky than traditional paper wipers², giving better hand protection. We don't compress our wipers. So the fibres are not flattened
- Superior performance and faster drying time, reducing sheet use by up to 15%³, decreasing wiping time and reducing waste.

15%

fewer used

WYPALL* L Wipers are twice as absorbent as other light dried crepe wipers. It means you use 15% fewer to complete the same task.³

¹ Independent market research at a number of locations compared WYPALL* L Wipers with AIRFLEX* Fabric with 1-ply conventional wipers over a number of tasks. 8 out of 10 users preferred WYPALL* L10 Wipers over 1-ply conventional wipers.

² In laboratory tests, WYPALL* L40 Wipers were compared against main competitors' 3-ply wiper. The WYPALL* L40 Wiper absorbed 144% more water and 37% more oil. Wet cross - directional tensile strength was 121% higher. Bulk was 19% higher.

³ Independent market research showed that WYPALL* L10 Wipers, compared with a 1-ply conventional wiper, reduces the number of wipers used by 15%.

AIRFLEX*
HIGHLY ABSORBENT FABRIC

With its large AIRFLEX* Fabric air pockets, a WYPALL* L40 Wiper absorbs double the amount of water compared to conventional wipers and up to 37% more oil.

WYPALL* L40 Wipers

Efficient general-purpose single use wiper

Utilising our unique Double Re-Creped (DRC) base sheet technology, WYPALL* L40 Wipers absorb liquids, oil, grease and larger spillages fast:

- **Highly- absorbent single use wiper**
Unique sponge-like inner layer soaks up liquids fast, staying strong when wet
- **Suitable for most surfaces, including hand/face use**
With soft, touchable outer layer
- **Rolled and Folded sheet dispensing formats**
To suit your needs

Ideal for:

- **Routine industrial cleaning and general maintenance**
Cleaning up large liquid spills and leaks
- **Efficient process line wiping**
Rapidly absorbing spillages, minimising production interruptions
- **Patient wiping tasks**
Outer layer soft enough for hand and face wiping, encouraging hygienic single use to minimise germs spreading

Supplied formats:

Technology / Certification:

Colour Options:

WYPALL* L30 Wipers

Exceptional performance, excellent value

If you are seeking a strong, absorbent single use wiper that is cost efficient, WYPALL* L30 Wipers deliver on both aspects:

- **Touchable, lightweight cloth feel**
Making it soft enough for personal face/hand use
- **Reinforced inner grid**
Unique DRC structure for strong and absorbent wet surface cleaning
- **Great everyday price**
Cost efficient alternative to airlaid wipers

Ideal for:

- **Oil spills**
Soaks up oil and grease rapidly
- **Machine wiping**
For lighter weight cleaning of machinery components
- **Wet surface wiping**
Grid structure keeps shape, even when wet

Supplied formats:

Technology / Certification:

Colour Options:

WYPALL* L20/10 Wipers

For light, precise wiping tasks

If you are seeking value and versatility for everyday wiping tasks, our reliably absorbent WYPALL* L20 and L10 Wipers can reduce the number of wipers you use:

- **Fast absorbing textured multi-ply wiper**
Constructed specifically to clean light surface grime and mop up small spills
- **Gentle wiping**
For delicate polishing and removal of dust and grime
- **A choice of high-capacity formats**
To suit your needs

Ideal for:

- **Final assembly wiping**
Water spills, spray and wipe jobs, drying and cleaning hands
- **Removing light soiling, smear-free spray and wipe finishes**
Polishing glass, smooth surfaces and cleaning tools
- **Handy multi-purpose convenience**
Quickly accessible to clean up water spills, dry and clean hands and wipe around food preparation areas

Supplied formats:

Technology / Certification:

Workplaces*

Speciality Wipers

Engineered performance for controlled environments

Certain controlled tasks require very specific wiping products and dispensing systems. With this in mind, we applied our expertise and wiping technologies to create a premium-quality task-specific range that can help maximise efficiency and productivity and reduce your wiping and solvent costs.

KIMTECH* Surface Preparation Wipers

Giving precision and reliability in controlled and critical cleaning tasks for Transportation and Industrial Manufacturing environments.

KIMTECH* Process Wipers

Strong, low-lint surface wipers for repeat use with cleaning chemicals and solvents within Transportation and the Industrial Manufacturing environment.

The WETTASK* System helps reduce the risk of cross contamination through its single-sheet dispensing delivery versus the traditional reusable wipe and disinfecting system protocols.

KIMTECH* Wipers for WETTASK* Systems

Refillable, fully enclosed wiping system, giving you greater control over solvent / disinfectant use and wiping costs.

WYPALL* Cleaning Wipes

Portable and solvent free wet wipes. Ready to use anytime, anywhere. Ideal for Industrial Manufacturing and Transportation.

WYPALL* Microfibre Cleaning Cloths

Created for cleaning professionals, lifting and trapping surface dirt fast. Ideal for Offices, Healthcare and the Hotel, Restaurant and Catering industry.

KIMTECH* Aerospace wipers

Delivering expert solutions, specifically engineered for the precision standard of aviation tasks.

KIMTECH* Wipers

Our family of KIMTECH* Wipers can meet your task specific needs:

KIMTECH* Surface Preparation Wipers

When precision and reliability is essential, the KIMTECH* Brand performs. Providing critical task cleaning solutions in Transportation, Healthcare and Manufacturing wiping tasks. Delivering controlled consistency when it matters.

KIMTECH* Process Wipers

Strong, low-lint surface wipers for repeat use with cleaning chemicals and solvents. Great for wiping oils and grease and ideal for:

Printing and Automotive painting applications

Wiper is 100% silicone free

Choose from:

- **Tack Cloths**
Removing sanding dust in industrial and manufacturing environments
- **Sealant Wipers**
Non-woven open structure, ideal for wiping sealant from tools and brushes
- **Microfibre Wipers**
For automotive valet tasks, this cost efficient, washable high-quality polyester/polyamide cloth does not fray
- **Process Wipers**
Strong, low-lint wipers, ideal for repeat use with cleaning chemicals and solvents

Supplied formats:

Technology / Certification:

Colour Options:

Exceptional
Workplaces*

WETTASK*

Refillable Wiping Systems for Industrial Applications

Productivity

- Ready to use system saves the worker time and effort
- Provides flexibility of using any preferred solvents / chemicals

Profitability

- Reduced solvent consumption by at least 20%
- Reduced waste disposal cost

Health & Safety

- Reduce your environmental footprint with less VOC's
- Limits exposure to solvents
- Increases worker safety

KIMTECH* SXX Wipers are compliant with industry standard solvents which are based on:

- MEK
- Isopropanol Acetone
- n-Heptane
- Ethanol
- Ethylacetate
- Xylole
- Cyclohexane
- Trichlormethane

KIMTECH* SXX Wipers for Industry manufacturing

- Textured fabric for dirt pick up
- Compatible with a wide range of solvents

WETTASK*

SXX Wipers

Designed specifically for solvent wiping and surface preparation, our refillable and enclosed wiping systems instantly enhance safety and reduce the likelihood of solvent spillage. Ideal for: Industrial manufacturing and transportation.

Strong and absorbent, for low lint applications.

Aviation industry compliant

Silicone free, pH stable, low lint wiper for use with solvents and harsh chemicals. Designed with the aviation transport sector in mind, all our WETTASK* SXX Aviation Wipers are BMS 15-5F and AMS 3819B certified.

Ideal for:

- **Industrial surface wiping**
Using your chosen solvent
- **Surface preparation wiping**
Using with solvents and harsh chemicals
- **Healthcare surface wiping**
Using your chosen disinfectant / detergent

Supplied formats:

Technology / Certification:

BMS 15-5F / AMS 3819B

Surface Distinction in Healthcare

WETTASK* DSX/DS Wipers

KIMTECH* Wipers for WETTASK* Refillable Wiping System

At KIMBERLY-CLARK PROFESSIONAL* we have a long history of helping healthcare staff perform their daily duties to the highest standards. Our experience in this area means we work hard to understand your needs and our development teams strive to meet them with innovative solutions.

Working together with us, we can help create a healthier healthcare workplace.

Surface Cleanliness is a highly important factor for driving out the threat of cross infection. Potentially harmful bacteria can survive on uncleaned surfaces for many hours. Therefore effective infection control programmes rely upon regular cleaning of surfaces.

Our KIMTECH* Wipers for the WETTASK* Refillable Wiping System have been designed with this need in mind. Our refillable, compact, self-contained wet wiping system offers highly efficient and cost effective wiping of critical areas in healthcare to help reduce the risk from cross-infection.

Compatible with a broad range of common cleaning and disinfecting solutions, based on:

- Glucoprotamine (Alcohol)
- Benzalkoniumchloride (BKC) and N-(3-Aminopropyl)-N-dodecylpropane-1,3-diamine
- Benzalkoniumchloride (BKC) - Glutaraldehyd

Cost effective

- A single bucket of wipers will disinfect an area up to 250m²
- Self-sealing lid prevents evaporation of the cleaning solution between uses
- Single sheet dispensing allows greater control
- Individual wipers are designed to optimise use of cleaning fluid

Safe and reliable

- Research study finding demonstrates that KIMTECH* Wipers maintain disinfectant efficiency over a period of minimum 28 days
- Integrated self-sealing lid keeps the wipers moist and ready to use when needed
- Fully enclosed dispenser system offers increased safety from splashes and spillages – cleaning fluid is only applied where it is needed

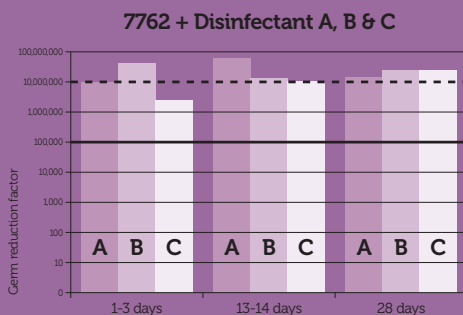

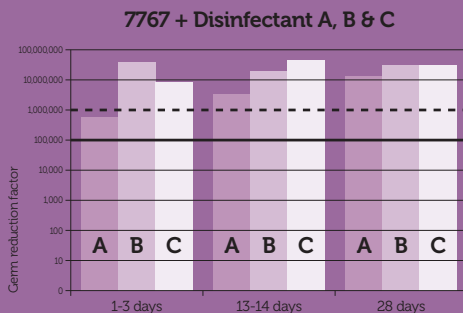

Versatile and portable

- Create your own pre-moistened wipes to your exact specification by adding your preferred cleaning solution to the system
- Portability of system enables usages across the entire healthcare facility

Make the right choice

Your choice of wiping materials can dramatically affect the power of disinfectant agent. With only 1.75 Liter of your disinfectant in combination with our Wet Task DS/DSX you will be able to disinfect an area of 250 m² and more.

Testing performed over a 4 week period concluded an outstanding performance of both KIMTECH* / WETTASK* DS and DSX Wipers.

■ Disinfectant A includes (Benzalkoniumchloride + Glucoprotamine2)

■ Disinfectant B includes (Glutaral + Benzyl-C12-18-alkydimethylammoniumchloride + Didecyldimethylammoniumchloride)

■ Disinfectant C includes (Benzyl-C12-18-alkydimethylammoniumchloride + N-(3-Aminopropyl)-N-dodecylpropan-1,3-diamine)

----- Outstanding performance throughout the whole 4 weeks

———— Minimum reduction factor to pass the test

WETTASK* DSX/DS Wipers

Giving you greater control over solvent/disinfectant use and wiping costs

Here is a new concept in wiping systems. We have created a refillable, airtight wiping system. Giving you better chemical control and pre-moistened wipers specific to cleaning tasks in your sector. You simply add the solution of choice:

- **Enhancing hygiene and safety standards**
Pre-moistened cloths helping you to control solvent and disinfectant costs
- **A fully enclosed system**
To reduce cross contamination, chemical vapours and splashes, enhancing worker safety

Ideal for:

Hygiene-critical Healthcare environments, requiring optimal infection control:

- **Resistance to mould and biological growth**
Chemically treated surface wipers, protecting patients in Acute and Primary Care zones
- **Longer-lasting protection**
Leaves fluid on wiped surface, so disinfectant continues working
- **An alternative to sprays**
Reducing wastage and giving better cost control

Our WETTASK* System reduces solvent consumption by at least 20% compared to traditional rags and other open systems.

Just choose the KIMTECH* Wipers that works best for your task, then add the chemical solution you already use. Add up to 2.5 litres of solution or until the wiper is wet enough for your application.

KIMTECH*

Aerospace Cloths

Understanding that while surface preparation and cleaning is a very small part of the whole aircraft & equipment manufacturing, repair and maintenance process, it is just as crucial and requires precise, tailored products.

Aerospace Abrasive surface cloths

- **Highly durable** aerospace cloths specifically designed for abrasive surfaces.

Heavy Duty Low Lint Cloths

- **Advanced material** for optimum linting and extractables control.

General purpose and chemical application cloths

- **An easy to implement** lean cleaning solution that addresses waste reduction and productivity improvement around general wiping needs.
- **More controlled dispensing** and application of solvent for reduced waste and better overall performance versus traditional bucket/decanter systems and disposable pre-saturated options.

WYPALL* Microfibre Cleaning Cloths absorb up to 8 times their weight in liquid.

WYPALL* Microfibre Cleaning Cloths

Created for cleaning professionals

For repeat use, our WYPALL* Microfibre Cleaning Cloths can be washed up to 300 times, without affecting performance.

Creating a more cost efficient choice for busy cleaning professionals:

- **No need for cleaning chemicals**
Reducing your annual cleaning costs and helping you to be more environmentally conscious
- **Four colour variants, for easy task segregation**
Helping to minimise cross contamination
- **Designed to lift and trap surface dirt**
For faster more efficient cleaning

Greatly increased cleaning power

Microfibre Cloth

Lifts and traps dirt and moisture

Surface is left clean, dry and polished

Cotton Cloth

Only pushes dirt and moisture

Surface is left dirty and wet

Ideal for:

- **Desk and surface cleaning**
Lifting and trapping dirt effectively
- **Glass and mirror cleaning**
Smooth texture of green Microfibre Cloth, for streak-free reflective surfaces
- **Reducing the risk of cross contamination**
One coloured cloth per task, maintaining high-hygiene clinical standards

Supplied formats:

Technology / Certification:

Colour Options:

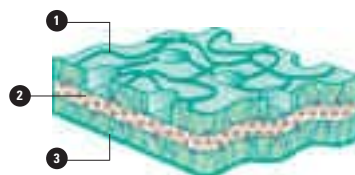

WYPALL* Cleaning Wipes

Pre-soaked, portable and ready to use anytime, anywhere

Ideal for manufacturing, engineering, maintenance, transport and service industries:

- **Removes stubborn grease and grime in one easy step**
No need for gels, rags, soap or water
- **Effective moisturising system**
Special formulation of natural and essential ingredients help reduce skin dryness
- **Specially designed fabric**
Cleans quickly, effectively and economically

1. Textured surface and advanced cleaning agent efficiently break down and dissolve stubborn dirt and grime
2. Absorbent layer soaks up and holds the dirt preventing it returning to the hands
3. Smooth surface cleans off any remaining dirt whilst leaving the skin coated with moisturisers

Ideal for:

- **Solvent free, with added moisturisers**
To protect hands and reduce skin dryness
- **Strong and durable**
Removing oil, grease, and grime from hands, tools and machinery
- **Controlled single sheet dispensing**
Reducing waste, and more hygienic as only user touches wiper

Supplied formats:

Dispensing systems

Portable dispensing systems designed for all environments

Would high capacity, a mobile system or hygienic single sheet dispensing be best in your environment? We have created a complete range of practical and innovative dispensing systems to suit individual work environments.

Throughout the design process, we always reflect on your usage, hygiene, waste, maintenance and cost efficiency needs, plus product damage and contamination. Making it easier for you to select a reliable dispensing system.

▲ **Large Roll**

High capacity for busy, high usage areas and can be easily moved to point of use. Also available with foot pedal for single handed dispensing.

Our dispensing systems are designed to ensure that the right amount of product is taken. Helping you to control usage and reduce wastage.

▲ **Right Rag Box and Multi-Box**
For instant wiper action giving you immediate access to wipers for emergency spills.

▲ **Centrefeed Roll**
Hygienic, single sheet dispensing, ideal for food areas. Featuring an easy, quick front loading and hygienic wipe clean surface that complies with HACCP.

▲ **Couch Cover Dispenser**
Providing hygienic dispensing, the Couch Cover Dispenser can be fixed on the wall near the treatment couches for easy dispensing.

▲ **Pop-Up Box**
Flexible system that controls usage that is ideal for cleaning or wiping on the move, the system offers controlled usage, while protecting the wiper.

▲ **BRAG* Box**
Mobile systems that control usage for cleaning or wiping on the move.

▲ **Folded / Quarterfold Dispensing**
Best choice for immediate accessibility in specific work areas with two systems presenting individual wipers in a splash proof, water repellent plastic polybag.

Creating Exceptional Workplaces* together

KIMBERLY CLARK PROFESSIONAL* don't just sell great products – we offer insights, support and a fresh perspective, delivering full service solutions that help change the face of your workplace.

How are we doing this? It starts by changing the conversation, reframing what a workplace can and should be all about. Not just a mere place to show up and work, but a place where people feel exceptionally safe, healthy and are inspired to be as productive as they possibly can be.

Our full service solutions offer you something much more valuable than just products: **healthier, safer and more productive workplaces.**

**We call these
Exceptional Workplaces***

Healthier

Safer

**More
productive**

Healthier workplaces

More than ever, organisations are operating with a leaner workforce; as such, it has become vital for them to look after their employees' well-being and health, delivering more hygienic work spaces. We provide you with the tools that will:

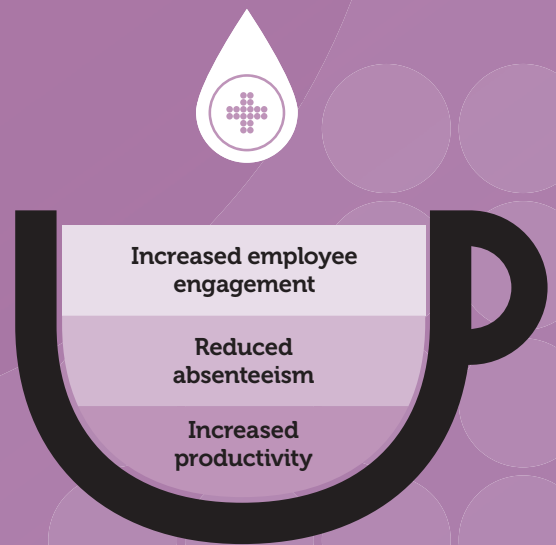

- **increase employee engagement**
- **reduce absenteeism**
- **increase productivity**

Increased productivity

We understand only too well how critical it is for you to find ways to reduce costs and improve margins. With this in mind, our products are designed to:

- **be more efficient**
- **reduce paper waste**
- **reduce storage space**

All of this saving you time and helping you reduce costs.
