

HAND HYGIENE PRODUCT GUIDE FOR HEALTHCARE

Hand Towels

Hand hygiene has the potential to prevent diseases and reduce health care-associated infections. A fundamental aspect to hand hygiene is the drying of hands. Effective and hygienic hand drying is one that avoids transfer of contaminated water droplets to surfaces, into the air or onto food or people. There are many scientific studies that investigate hand drying methods, the overall conclusion is the most hygienic way to dry the hands is to use single use towels.

Our hand towels are made of strong highly absorbent AIRFLEX[®] fabric. Most of them are supplied in cost saving compressed packs; with 18% more towels per case for Folded or compressed Rolls. They feature environmental certifications like FSC or Ecolabel.

Folded

AQUARIUS* Folded Hand Towel Dispenser
6945

Paper towels are dispensed one at a time so they're touched only by the user. This eliminates the need to touch the dispenser; helping to reduce contamination and the spread of germs. Our unique patented overflow prevention device makes refilling easy and prevents jamming and wastage.

High-gloss, easy-clean finish and no dirt or dust traps, has a window (so you can see when a refill is needed).

Rolled

AQUARIUS* SLIMROLL* Rolled Hand Towel Dispenser
6953

Compact Dispenser with great capacity
The SCOTT[®] SLIMROLL* System puts high performance, high capacity rolled towels where they need to be, not just where they fit. Hand towels on high-capacity rolls that control how much tissue you take and help cut costs and waste.

AQUARIUS* Rolled Hand Towel Dispenser (25cm sheet length)
6989

Our highest capacity system for optimal user satisfaction and cleaning efficiencies
Our system with 25cm sheet length (6989) delivers more sheets and more hand dries than other manual hand towel systems in the market*. System is twice as easy to use as some other competitor systems* = preferred by end users & helps increase hygiene compliance. Superior dispensing performance tabbing up to 2.5 times less often*
